GE Profile Performance SpacemakerPlus® Microwave ...

I have a GE profile Performance/ Sensor Convection built in over the range oven. It was working fine until I opened the door while heating something. The panel went blank except for an "A" . There is a dull light still burning in the front right corner and a sound like a fan. What is wrong? Is it dangerous or a fire hazard?

I have a 1998 GE Profile Performance Microwave -- sensor convection model. Recently, the microwave will turn back on after I clear the panel and close the door. I think it's just the fan, but don't know for sure. The upper latch does not show when I tested the OPEN button. Just the lower one moves up to release the door. Is there a way to fix this?
