The HCU-3C controller is a stand-alone device to control up to three SmarAct positioners. It has three control knobs, a joystick and a display. The HCU-3C also includes a controller menu offering the possibility to define several important driving parameters. The HCU-3CM enables you to control closed-loop positioners with integrated -M or -L sensor.

HCU-3C Controller- SmarAct GmbH

The controller supports Innco and Innco-systems positioning devices, which are controlled via fiber optic cables. The GPIB (IEEE) and LAN (TCP/IP) ports add additional control methods and for future upgrades. Innco also offers a Hand Control Unit (HCU) for use with up to 3 devices. The connection of the HCU can be by either fiber optic or wire ...

allowed to bypass the HCU, thereby not doing any heating or cooling of the chamber. In this way temperature control is achieved by governing the volume of either hot or cold fluid passing through the HCU reheat coil and not by mixing hot and cold streams. The temperature control valves are actuated by an electronic temperature control unit. It can

Control Systems. The Step-Direction Controller (SDC) is a low-level control system, which allows to move SmarAct's positioners in a stepper motor like manner, but with a very high resolution. Therefore, only two TTL signals are required in order to define the steps and the direction. The SDC2 control unit provides a quadrature signal feedback.
