History Of Control Engineering

Engineering the Industrial Revolution. The first phase of modern engineering emerged in the Scientific Revolution. Galileo's Two New Sciences, which seeks systematic explanations and adopts a scientific approach to practical problems, is a landmark regarded by many engineer historians as the beginning of structural analysis, the mathematical representation and design of building structures.

History of engineering - CREATING TECHNOLOGY

The concept of engineering has existed since ancient times as humans devised fundamental inventions such as the pulley, lever, and wheel. Each of these inventions is consistent with the modern definition of engineering, exploiting basic mechanical principles to develop useful tools and objects.. The term engineering itself has a much more recent etymology, deriving from the word engineer, which ...
