GRAPHICAL SOLUTION TO A LINEAR PROGRAMMING PROBLEM The easiest way to solve a small LP problem such as that of the Shader Electronics Company is the graphical solution approach. The graphical procedure can be used only when there are two decision variables (such as number of Walkmans to produce, X_1 , and number of Watch-TVs to produce, X_2)

Optimized handling functions for packaging machines. Short product changeover times, quick format changes and the continuously increasing diversity of packaging materials are just some of

the challenges faced by the manufacturers of packaging machines. As a result, there is a growing tendency to use handling robots directly in the process.

Optimized handling functions for packaging machines

Material handling equipment is mechanical equipment used for the movement, storage, control and protection of materials, goods and products throughout the process of manufacturing, distribution, consumption and disposal. The different types of handling equipment can be classified into four major categories: transport equipment, positioning equipment, unit load formation equipment, and storage ...
