SEA-DOO GTX DI OPERATOR'S MANUAL Pdf Download.

Got a 2001 Sea Doo LRV with a blown motor. Ordered a 2002 Sea Doo RX DI 951 on ebay and this 951 looks a lot different. From what I understand it should interchange with the XP and GTX 951/947 models. Am I wrong or did I just buy something that will not fit my application. I'm new to PWC and learning, so go easy.

Will 2002 Sea Doo RX DI 951 motor swap into a 2001 Sea Doo LRV

The Sea-Doo GTX is a personal watercraft (PWC) made by Bombardier Recreational Products of Canada. Part of their Sea-Doo line of watercraft, the Sea-Doo GTX has been produced since 1992. It is a three-person personal water craft with a 'luxury' ride combined with a series of engines.

Sea-Doo GTX - Wikipedia

When the engine revs higher, what you read is the voltage coming from the magneto and regulated down to no more than 14.8v. The battery gets charged because the magneto is putting out more current (amps) then is being used by the system. With the engine at 5500 rpm, you should read about 5 amps and 12.5v - 14.8v at the battery.

Charging system voltage | Sea-Doo Forum

When I got my 2000 gtx with the 951 DI motor, the engine had a piston with a hole in it. I assume the hole was blown through the piston as a result of a complete starvation of oil as the oil line was

connected to the compressor (where the coolant is supposed to enter) and nothing at all was connected to the oil pump. Whoever hooked the motor up after the rebuild really fudged it up.
