The Price Problem: Head into a Harley-Davidson dealer sometime and look at the prices. \$10,000, \$15,000, \$18,000. . . let's make something very clear, any motorcycle that costs more than 10 grand better be delivering some serious performance. There is no excuse for these kind of prices. A Harley-Davidson is a very expensive fashion statement ...

### The problem with Harley-Davidson motorcycles - Everything2

Time will tell if the lifter problem is solved. The engine has solid lifters which means there is an adjustment screw on the rocker arms near the valve stem. Harley-Davidson claims the valves never need to be adjusted for the life of the engine due to the valves being light in weight so there will be no valve recession.

Harley experimented by using INA bearings in place of Torringtons on a few Shovelhead models and then converted totally to the INA with the Evolution. INA bearings have intermittently caused problems when used on the left side of the V-twin's camshaft(s). As such, wise engine builders replace the INA bearing with a B-148 Torrington.

problems that are known of at Harley Davidson or their dealers at this point in time. I was speaking to the manager Columbia Harley Davidson where I purchased my 2000 FLHR, he explained to me if a Fathead comes in with any serious problems engine wise they are to just remove the engine from the bike, ship it to Harley, if the

**twin cam 88 problems - Google Groups**

The problem is the design of the cam chain system. It uses plastic "shoes" riding on the cam chains that can (and do) wear out. Harley has made some changes in later model bikes, but even with the

new hydraulic tensioning system, it is not a true fix. What is the problem? The shoes rub against the two chains and the plastic shoes wear out.
