These are another excellent set of radios that have many fine features for scanning and trunking. However, anyone who has tried to read the manuals that come with the radios know it can be a little hard (if you're lucky) to find, read, and figure out some of the steps, especially in the searching and trunking sections.

Trunking systems let a large group of 2-way radio users (or even different groups of 2-way radio users) efficiently use a set of frequencies. Instead of selecting a specific frequency for a transmission, the user's radio selects a programmed trunking bank in the system when that user presses their PTT (push to talk) button.

### **Portable AM/FM Radios for sale | eBay**

A two-way radio is a radio that can both transmit and receive a signal (a transceiver), unlike a broadcast receiver which only receives content. It is an audio (sound) transceiver designed for bidirectional person-to-person voice communication with other users with similar radios. Two-way radios are available in mobile, stationary base and hand-held portable configurations.

### **Two-way radio - Wikipedia**

Very High Frequency (VHF) Omni-Directional Range (VOR) is a type of short-range radio navigation system for aircraft, enabling aircraft with a receiving unit to determine its position and stay on course by receiving radio signals transmitted by a network of fixed ground radio beacons. It uses frequencies in the very high frequency (VHF) band from 108.00 to 117.95 MHz.

Hi! Welcome to my site! I've worked in broadcasting and electronics all my life and have been interested in portable transistor radios since the early pocket portables of the 50's through today's multiband radios. For 26 years I worked for CBS Radio as Production Director for one of its station clusters and I previously managed...
