In geotechnical engineering, drilling fluid, also called drilling mud, is used to aid the drilling of boreholes into the earth. Often used while drilling oil and natural gas wells and on exploration drilling rigs, drilling fluids are also used for much simpler boreholes, such as water wells. One of the functions of drilling mud is to carry cuttings out of the hole.

Questioning the Story: How far off the coast was the rig and how deep was it drilling? The Deepwater Horizon true story reveals that the rig was located 52 miles off the coast of Venice, Louisiana. It was the largest oil rig in the world at the time and had been digging the deepest well in history, starting on the seabed at a depth of 5,000 feet beneath the Gulf of Mexico.
