Everything around us is made of matter. Matter is anything that has mass and takes up space. We can classify matter by its physical state (solid, liquid, gas, plasma) and many other physical properties, but we can also classify it by its composition.

### **Pure Substances and Mixtures - Mr. Winkelhage's Website**

The purpose of this section is to build the understanding of how treated wastewater can be beneficial when water is short. The Water, The World Water Crisis video does a superb job at showing the importance of clean water in our lives and telling the stories of people that are living without clean water.. Before the video I ask the students to watch the video to find out:
