### **Seven ways to pinpoint that high-pitched, whining noise**

High pitched engine whine that tracks with RPMs. As the tach.... Yes, it could be the alternator or a pulley nearby. I listen to these noises with a long screwdriver, it is like putting your ear directly on the alternator. Once you have had a listen, take the belt off to see if gone or not. I hope it is something like this.

Hi Everyone, There is a very high pitch whine/whistle coming from the engine compartment. I've been able to narrow down what I can and can not do to influence the noise. My car is an automatic. - The noise first becomes apparent once the engine has been warm for ~15 minutes. If everything is cold, no (audible) noise.

### **Very high pitch noise, seemingly unrelated to engine speed ...**

Usually, high pitched noises like a squeak or a squeal are caused by your engine belts. The belts are made from a hard rubber and run on metal and plastic pulleys. If a pulley is misaligned or seized it will rub on the edge of the belt causing this squeaking or chirping.

Speaker makes high pitched whine, louder when engine revs? I drive a 98 ford explorer xlt v6. I wen tto start it today and the battery was dead. I jumped it off and when I turned the radio on, the right rear speaker made a whining sound. When you rev the engine, the whining sounds pitch gets higher and it may get louder as well (hard to tell ...

### **speaker makes high pitched whine, louder when engine revs ...**

Engine Problems There are certain engine problems that may create a whining or high pitched noise. Getting the whole engine assembly checked might narrow down the problem to some loose component or misalignment. It may also be due to a lack of lubrication causing friction in some engine parts.

### **Diagnosing Whining Noise When Accelerating - WheelZine**

High pitched whine to the right front passenger side that appears to increase with acceleration It is a wheel bearing, no doubt. the wheel bearing is pressed in so if you do the job yourself you will need to take the hub somewhere to have the new bearing pressed in, but 100% the bearing.

### **High Pitched Whining Noise - CarComplaints.com**

At a cold start, my 3.4 makes a high-pitched whistling/whining noise. Around 1500-2000 rpm is when it happens and seems to mimic acceleration. It disappears when the engine warms up. The belts have been replaced, and the mechanic claims the pulleys are fine. It seems to be coming from the alternator side of the engine.

### **BMW High Pitched Engine Noise**

It began this morning when I started my truck to go to work. I have a 2006 Tacoma 4.0L. When idling or accelerating, my engine is making a high pitched whine, almost sounds like I have a supercharger. When I left work, my truck had a little trouble turning over. When I pulled into my driveway, I attempted to start my truck again.

cause of high pitched whine from engine. There is a high pitch whine that rises with rpm, hward in neutral at idle. See More 2007 GMC Envoy Questions. Get your car fixed

### **High pitched whining in engine - 2007 GMC Envoy**

Re: High pitched whine at idle I first noticed this when I got my first TDI, This noise is the turbine spinning at idle. I would guess that at idle the turbine is spinning at 20-30,000 rpm and the engine is still drawing a vacume.

### **High pitched whine at idle - Page 2 - TDIclub Forums**

Any time I start it up there is a high pitched whine, like a bearing going bad, coming from under the hood which lasts about 20 seconds then slows and stops like an electric motor with a bad bearing has been shut off. If I turn off the engine right away, the whine starts to slow but the engine stops before the whine stops.

### **high pitched whine - Engine and Car Noises**

High pitch sound coming from engine? high pitch sound when engine is cold, as it warms up. the high pitch sound will sound when I increase engine revs to 1,500 to 2,000 rpm, WHEN cold. But as soon as the engine is warm and I stop the car and then accelerate when the engine revs past the 1,500-2,000 range it stops.

Re: High pitched whine at idle On the gas 'Dubs, there's a prefilter screen somewhere in the fuel tract that sometimes fills up with gunk and causes poor performance. Could there be such a screen on the fuel pick-up or before the fuel pump that clogs up and causes the electric fuel pump in the tank (or rear of the car) to whine?
