Oven cleaning is a task many of us put off as long as possible, but it doesn't have to be a chore. If you have a self-cleaning oven, you can simply press a few buttons and have your oven do most of the work. Unfortunately, self-cleaning ovens do throw off a lot of heat and often smell unpleasant while they are working.

The function of the oven sensor is to detect the temperature within the oven cavity. If you notice that the oven is too hot or too cold, or it is not heating evenly, you may need to replace the oven sensor. The oven sensor is typically located in the back of the oven so you will most likely need to pull your oven out to access it.
